📄 PROFILE

Motivated and detail-oriented Software Engineering student with a strong foundation in web development and software engineering principles. Experienced in building full-stack applications through academic and personal projects. Skilled in designing user-friendly interfaces, developing secure backend systems, and solving complex technical problems. Passionate about learning new technologies, collaborating with teams, and creating innovative software solutions that deliver real-world value.

🎓 EDUCATION

B.Sc. in Software Engineering

Addis Ababa Science and Technology University

2023 – 2027 | Addis Ababa, Ethiopia

🌐 LANGUAGE

English

Amharic

📁 PROJECTS

School Management System

2026 – Present

- Engineered a comprehensive school management system to streamline student enrollment, attendance tracking, course management, and reporting.
- Developed features that improved administrative workflows and reduced processing time.
- Worked closely with stakeholders to refine system functionality and enhance usability.
- Implemented secure data management and reporting capabilities.

Printer Reservation & Inventory Management System

2026 – Present

- Designed and developed a printer reservation and inventory management platform for reseller networks.
- Streamlined order fulfillment processes and improved operational efficiency through automated workflows.
- Implemented inventory tracking, reservation management, and reporting functionalities.
- Collaborated directly with stakeholders to ensure the platform met business requirements.

Agent Performance & Commission Analytics Platform

2026 – Present

- Built a business analytics platform for monitoring agent performance and commission calculations.
- Developed dashboards, KPI tracking, automated commission calculations, and reporting tools.
- Leveraged data visualization and analytics to support business decision-making.
- Focused on system scalability, accuracy, and performance optimization.

Online Secure Voting System

2024 – 2025

- Developed a secure online voting platform with a focus on backend architecture and system security.
- Implemented user authentication, role-based access control, election management, candidate management, and vote processing functionalities.
- Designed and maintained backend services to ensure reliability, scalability, and data integrity.
- Collaborated with team members to deliver a secure and user-friendly voting experience.

Online Marketplace

2025 – 2026

- Designed and developed an online marketplace platform that enables users to browse, manage, and interact with products and services.
- Implemented core system functionalities with a focus on usability, maintainability, and performance.

EXPERIENCE

Freelance Software Developer | DIP COM TECHNOLOGIES

04/2026 – Present | Addis Ababa, Ethiopia

- Designed, developed, and maintained multiple business-critical software systems across education, sales, and business analytics domains.
- Built a printer reservation and inventory management platform that streamlined order fulfillment and improved operational efficiency.
- Developed a comprehensive school management system supporting student enrollment, attendance tracking, course management, reporting, and administrative workflows.
- Created an agent performance and commission analytics platform featuring KPI tracking, automated commission calculations, dashboards, and reporting tools.
- Collaborated directly with stakeholders to gather requirements, define system architecture, and deliver tailored software solutions.
- Implemented secure role-based access controls, reporting modules, and data management workflows across all applications.
- Performed ongoing maintenance, optimization, and feature enhancements to ensure system reliability, scalability, and performance.

INSA Talent Center

2024 – 2025 | Addis Ababa, Ethiopia

- Contributed to the development of a secure online voting platform designed for organizational elections.
- Developed backend services, APIs, authentication mechanisms, and database functionality.
- Implemented security-focused features to ensure vote integrity, user authentication, and reliable system performance.

SKILLS

Programming Languages

Python, JavaScript, TypeScript, Java, PHP, C++, HTML5, CSS3

Frontend Development

- React, React Router, Next.js, Vite, Context API
- Tailwind CSS
- Strong focus on accessibility, responsiveness, and UI/UX

Backend Development

- Django, Django REST Framework
- FastAPI, Flask, PHP (XAMPP stack)

Mobile App Development

React Native for cross-platform mobile apps

Databases & Tools

- Firebase, PostgreSQL, MySQL, MongoDB
- Git, GitHub, Postman, VS Code, Figma
